## **Let the games begin (Its all in the mind Book 1)** Mike Christensen

In this first part of a trilogy, we meet Stacy and Greg. They couldn't be more different. She lives in a fantasy world; he only sees facts and reality. And yet something links them, without them even knowing it – a son. She finds out when a computer game takes over her mind with chilling results; he learns of it when an unknown hacker cracks the automated systems at an exclusive weekend hideaway where Greg is staying. Greg is the retired director of The Centre, the country's key intelligence agency, and enlists the aid of Frank, his friend and successor to find out more. And the more The Centre discovers about the author, the more alarming the potential consequences. Has he been able to create mind-controlling software, so sophisticated that even The Centre cannot crack the code? It would appear so. And then, a continent away, something happens that resolves it all. Or does it?
