BOOK 1

SURVIVAL MANUAL

Preface

You could find yourself alone in a remote area—possibly enemy territory—with little or no personal gear. This manual provides information and describes basic techniques that will enable you to survive and return alive should you find yourself in such a situation.

If you are a trainer, use this information as a base on which to build survival training. You know the areas to which your unit is likely to deploy, the means by which it will travel, and the territory through which it will travel. Read what this manual says about survival in those particular areas and find out all you can about those areas. Read other books on survival. Develop a survival-training program that will enable your unit members to meet any survival situation they may face. It can make the difference between life and death.

Contents

PREFACE vii

Precautions 13-11
Desert Hazards 13-12

BOOK 2

Supplement to Airplane Upset Recovery Training Aid Rev 1

Introduction

This document is intended to supplement the Airplane Upset Recovery Training Aid Rev 1 that was released in August 2004. It addresses the issues associated with operations, unintentional slowdowns, and recoveries in the high altitude environment. While the Airplane Upset Recovery Training Aid addressed airplanes with 100 seats or greater, the information in this document is directly applicable to most all jet airplanes that routinely operate in this environment. This information has also been inserted in the Airplane Upset Recovery Training Aid Rev 2 completed October 2008. Consult the operations manual for your airplane type, as that information takes precedent to the following guidance.
