Encyclopedia of Taoism (2 Volume Set)

The *Encyclopedia of Taoism* provides comprehensive coverage of Taoist religion, thought and history, reflecting the current state of Taoist scholarship. Taoist studies have progressed beyond any expectation in recent years. Researchers in a number of languages have investigated topics virtually unknown only a few years previously, while others have surveyed for the first time textual, doctrinal and ritual corpora. The *Encyclopedia* presents the full gamut of this new research.

The work contains approximately 1,750 entries, which fall into the following broad categories: surveys of general topics; schools and traditions; persons; texts; terms; deities; immortals; temples and other sacred sites. Terms are given in their original characters, transliterated and translated. Entries are thoroughly cross-referenced and, in addition, 'see also' listings are given at the foot of many entries. Attached to each entry are references taking the reader to a master bibliography at the end of the work. There is chronology of Taoism and the whole is thoroughly indexed.

There is no reference work comparable to the *Encyclopedia of Taoism* in scope and focus. Authored by an international body of experts, the *Encyclopedia* will be an essential addition to libraries serving students and scholars in the fields of religious studies, philosophy and religion, and Asian history and culture.
