Fabricated: The New World of 3D Printing

Hod Lipson, Melba Kurman

Fabricated: The New World of 3D Printing Hod Lipson, Melba Kurman
Voted one of the top 25 books of 2013 in China by Chinese readers!

Fabricated tells the story of 3D printers, humble manufacturing machines that are bursting out of the factory and into homes, businesses, schools, kitchens, hospitals, even the fashion catwalk. The magic happens when you plug a 3D printer into today's mind-boggling digital technologies. Add to that the Internet, tiny, low cost electronic circuitry, radical advances in materials science and biotech and voila! The result is an explosion of technological and social innovation.

Fabricated provides readers with practical and imaginative insights to the question "how will 3D printing technologies change my life?" Based on hundreds of hours of research and dozens of interviews with experts from a broad range of industries, *Fabricated* offers readers an informative, engaging and fast-paced introduction to 3D printing now and in the future.

Chapters and contents

Chapter 1: Everything is becoming science fiction. What would "just another regular day" look like in a future, 3D printable world?

Chapter 2: A machine that can make almost anything. Information morphed from analog form to digital. Will physical objects be next? Ten key principles explain 3D printing's disruptive power.

Chapter 3: Nimble manufacturing. Emerging business models lie somewhere between mass production and the local farmer's market. Small-batch manufacturing is becoming profitable, freeing entrepreneurs from the tyranny imposed by economies of scale.

Chapter 4: Tomorrow's economy of printable products. 3D printing, low-cost design and manufacturing technologies create new market opportunities as consumers increasingly crave on-demand, custom "experience" products.

Chapter 5: Printing in layers. For those of a technological bent, a deep dive into the inner workings of the 3D printing process.

Chapter 6: Design software, the digital canvas. Without an attached computer, a 3D printer is just an elaborate paperweight. An overview of design software and "digital capture."

Chapter 7: Bioprinting in "living ink." Design software and 3D printers read medical scans to fabricate living tissue and custom artificial joints. How long before all of us can tap into this Fountain of Youth?

Chapter 8: Digital cuisine. Today you can 3D print "high resolution" and delicious shortbread, chocolate figurines and tortillas. In the future, Quantified Selfers and couch potatoes alike will balance their diets by streaming biometrics to a food printer.

Chapter 9: A factory in the classroom. Primary and middle school teachers teach "children's engineering" using vivid, hands-on lesson plans.

Chapter 10: Unleashing a new aesthetic. 3D printers are the output device computer-savvy artists, designers and architects have been waiting for.

Chapter 11: Green, clean manufacturing. What's cleaner to make? A 3D printed plastic toy or a mass-produced plastic toy? 3D printers may introduce greener living... or help us drown in a rising tidal wave of plastic junk.

Chapter 12: Ownership, safety and legal frontiers. Technology evolves faster than the law. Consumer safety and intellectual property laws will stretch to deal with printed weapons, counterfeit products and unregulated custom-made products.

Chapter 13: Designing the future. Why was Star Trek's Replicator used only to make Earl Grey tea? Because once we shape our tools, then our tools shape us. Next-generation design software will unshackle our imaginations, giving us new ways to imagine and edit the physical world.

Chapter 14: The next episode of 3D printing. What lies ahead? Watercolor artists create infinite hues by blending primary colors. Regular people will design and blend standard materials -- or micro-scale electronic components -- and "print" them out in fine, meticulously patterned sprays. The result? Weird and wacky new materials. Robots that walk out of the 3D printer. Ready-made, responsive smart materials.

From reader reviews:

Richard Linneman:

As people who live in often the modest era should be revise about what going on or facts even knowledge to make these individuals keep up with the era that is certainly always change and move ahead. Some of you maybe will update themselves by examining books. It is a good choice for you but the problems coming to anyone is you don't know what one you should start with. This Fabricated: The New World of 3D Printing is our recommendation so you keep up with the world. Why, as this book serves what you want and want in this era.

Latricia Wynkoop:

Now a day individuals who Living in the era where everything reachable by interact with the internet and the resources included can be true or not involve people to be aware of each info they get. How individuals to be smart in having any information nowadays? Of course the solution is reading a book. Reading a book can help folks out of this uncertainty Information particularly this Fabricated: The New World of 3D Printing book since this book offers you rich data and knowledge. Of course the data in this book hundred per-cent guarantees there is no doubt in it you probably know this.

Henrietta Belcher:

Reading a publication tends to be new life style with this era globalization. With reading you can get a lot of information that can give you benefit in your life. Along with book everyone in this world can share their idea. Books can also inspire a lot of people. Many author can inspire their very own reader with their story or even their experience. Not only situation that share in the ebooks. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors on earth always try to improve their ability in writing, they also doing some analysis before they write for their book. One of them is this Fabricated: The New World of 3D Printing.

Wesley Baker:

Are you kind of active person, only have 10 or 15 minute in your day time to upgrading your mind skill or thinking skill also analytical thinking? Then you are having problem with the book than can satisfy your limited time to read it because pretty much everything time you only find book that need more time to be study. Fabricated: The New World of 3D Printing can be your answer given it can be read by an individual who have those short spare time problems.
