Introduction to Crime Scene Photography

Edward M. Robinson

Introduction to Crime Scene Photography Edward M. Robinson

Introduction to Crime Scene Photography acquaints the reader with the essentials of basic crime scene photography techniques. It looks at the concepts related to composition and relates them to the types of photographs captured by crime scene photographers. It explains how to capture images based on the exposure settings chosen to produce the effect desired. It considers the techniques used needed to control and maximize Depth of Field (DOF), and reviews how the different lenses will affect an image.

Organized into seven chapters, the book begins with an overview of crime scene photography and composition, including the three cardinal rules of good photography. It then proceeds with a discussion of the benefits of bounce flash and how to utilize this technique to properly compose the subject of interest. It also explains how to capture any image necessary at the crime scene by combining the concepts of composition, nonflash exposure, DOF, flash exposure, and the use of various types of lenses. In addition, the reader is introduced to various energy sources and filters, digital processing of evidentiary photography, and legal issues related to photographs and digital images. Examples and illustrations are provided throughout to demonstrate how the concepts examined tend to form a sort of symbiotic relationship.

This text will benefit scene investigators and photographers, forensic consultants, forensic scientists, undergraduate students in forensic and/or criminal justice programs, law enforcement professionals, and anyone who wants to acquire the skills needed to be a successful crime scene photographer.

*Contains over 350 high-quality 4-color images

*Includes a Companion Web site hosting images from the volume as well as an Instructor Web site with key words, lecture slides, test bank and supplemental images

Do you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Attempt to pick one book that you find out the inside because don't evaluate book by its handle may doesn't work the following is difficult job because you are frightened that the inside maybe not since fantastic as in the outside look likes. Maybe you answer may be Introduction to Crime Scene Photography why because the wonderful cover that make you consider regarding the content will not disappoint an individual. The inside or content will be fantastic as the outside or even cover. Your reading sixth sense will directly direct you to pick up this book.

William Kavanaugh:

As a university student exactly feel bored to be able to reading. If their teacher questioned them to go to the library as well as to make summary for some publication, they are complained. Just very little students that has reading's soul or real their hobby. They just do what the educator want, like asked to the library. They go to presently there but nothing reading very seriously. Any students feel that studying is not important, boring and also can't see colorful pics on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Introduction to Crime Scene Photography can make you experience more interested to read.
