Algorithms for Statistical Signal Processing John G. Proakis, Charles M. Rader, Fuyun Ling, Marc Moonen, Ian K. Proudler, Chrysostomos L. Nikias

Keeping pace with the expanding, ever more complex applications of DSP, this authoritative presentation of computational algorithms for statistical signal processing focuses on *advanced topics* ignored by other books on the subject. Algorithms for Convolution and DFT. Linear Prediction and Optimum Linear Filters. Least-Squares Methods for System Modeling and Filter Design. Adaptive Filters. Recursive Least-Squares Algorithms for Array Signal Processing. QRD-Based Fast Adaptive Filter Algorithms. Power Spectrum Estimation. Signal Analysis with Higher-Order Spectra. For Electrical Engineers, Computer Engineers, Computer Scientists, and Applied Mathematicians.

From reader reviews:

James Matter:

Have you spare time for just a day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a walk, shopping, or went to the particular Mall. How about open or perhaps read a book allowed Algorithms for Statistical Signal Processing? Maybe it is to be best activity for you. You realize beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have other opinion?

Minnie Rivera:

The book Algorithms for Statistical Signal Processing can give more knowledge and information about everything you want. So why must we leave the good thing like a book Algorithms for Statistical Signal Processing? Several of you have a different opinion about book. But one aim that will book can give many facts for us. It is absolutely proper. Right now, try to closer with your book. Knowledge or data that you take for that, you may give for each other; you may share all of these. Book Algorithms for Statistical Signal Processing has simple shape however you know: it has great and massive function for you. You can seem the enormous world by open and read a book. So it is very wonderful.

Andrew Blanton:

What do you with regards to book? It is not important along? Or just adding material if you want something to explain what your own problem? How about your extra time? Or are you busy man? If you don't have spare time to perform others business, it is make you feel bored faster. And you have extra time? What did you do? Everybody has many questions above. The doctor has to answer that question because just their can do in which. It said that about book. Book is familiar in each person. Yes, it is right. Because start from on kindergarten until university need this specific Algorithms for Statistical Signal Processing to read.

Gloria Quinones:

The particular book Algorithms for Statistical Signal Processing has a lot details on it. So when you check out this book you can get a lot of profit. The book was published by the very famous author. Mcdougal makes some research prior to write this book. This specific book very easy to read you will get the point easily after reading this book.
