Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science)

Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science)

Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science)

Biometrics: Personal Identification in Networked Society is a comprehensive and accessible source of state-of-the-art information on all existing and emerging biometrics: the science of automatically identifying individuals based on their physiological or behavior characteristics. In particular, the book covers:

*General principles and ideas of designing biometric-based systems and their underlying tradeoffs

*Identification of important issues in the evaluation of biometrics-based systems

*Integration of biometric cues, and the integration of biometrics with other existing technologies

*Assessment of the capabilities and limitations of different biometrics

*The comprehensive examination of biometric methods in commercial use and in research development

*Exploration of some of the numerous privacy and security implications of biometrics.

Also included are chapters on face and eye identification, speaker recognition, networking, and other timely technology-related issues. All chapters are written by leading internationally recognized experts from academia and industry.

Biometrics: Personal Identification in Networked Society is an invaluable work for scientists, engineers, application developers, systems integrators, and others working in biometrics.

From reader reviews:

Marcia Fullerton:

As people who live in the actual modest era should be revise about what going on or details even knowledge to make these people keep up with the era which can be always change and move ahead. Some of you maybe will probably update themselves by reading through books. It is a good choice for you personally but the problems coming to you is you don't know what kind you should start with. This Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) is our recommendation to make you keep up with the world. Why, because book serves what you want and want in this era.

William Martin:

Do you considered one of people who can't read pleasant if the sentence chained in the straightway, hold on guys this particular aren't like that. This Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) book is readable by you who hate those perfect word style. You will find the data here are arrange for enjoyable looking at experience without leaving also decrease the knowledge that want to provide to you. The writer associated with Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) content conveys objective easily to understand by a lot of people. The printed and e-book are not different in the written content but it just different such as it. So , do you nevertheless thinking Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) is not loveable to be your top record reading book?

Stephen Wilson:

Often the book Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) will bring that you the new experience of reading any book. The author style to explain the idea is very unique. Should you try to find new book to read, this book very appropriate to you. The book Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) is much recommended to you to see. You can also get the e-book through the official web site, so you can more readily to read the book.

Deanna Reed:

A lot of people said that they feel bored when they reading a reserve. They are directly felt the item when they get a half areas of the book. You can choose the book Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) to make your reading is interesting. Your personal skill of reading ability is developing when you similar to reading. Try to choose straightforward book to make you enjoy you just read it and mingle the impression about book and examining especially. It is to be first opinion for you to like to open up a book and learn it. Beside that the e-

book Biometrics: Personal Identification in Networked Society (The Springer International Series in Engineering and Computer Science) can to be your brand-new friend when you're really feel alone and confuse in doing what must you're doing of the time.
