A Clinical and Forensic Interview Schedule for the Hare Psychopathy Checklist: Revised and Screening Version

Carl B. Gacono

A Clinical and Forensic Interview Schedule for the Hare Psychopathy Checklist: Revised and Screening Version Carl B. Gacono

This semi-structured interview format offers a time-efficient method for gathering and recording information and scoring the PCL-R and PCL:SV.

- Similar to semi-structured interview schedules used by clinicians--facilitates a rapid accumulation of data. Scoring is complete by the end of the interview.
- Directly links data to individual items, allowing forensic experts to defend their scoring.
- Uses a format that is familiar to clinicians. Items are scored consecutively, and arranged in an order that allows rapid scoring (related items grouped).
- Appropriate for clinical, forensic, and research settings.
- Allows for an easy check of inter-rater reliability of each protocol.
- Tailored to an individual evaluation.
- Eliminates the need to purchase multiple forms (use for both PCL-R & PCL:SV).
- Reduces administration time by a third to a half.

Developed through use in over 400 PCL-R and PCL:SV evaluations in a major forensic psychiatric hospital, and initially published in Gacono (Ed.), *A Clinical and Forensic Interview Schedule for the Hare Psychopathology Checklist* (Lawrence Erlbaum Associates, 2000), the CFIS has been utilized in over a dozen clinical and forensic settings, with good inter-rater agreement and sound validity.
